

Flair coming up from back of canvas

View from top

Flair going down into front of canvas

Secure the

Flair in the center of the Berry with a pin head stitch and then come up on the opposite side of the berry from the stem.

Take your needle off your thread and insert the end of a small bar straw into the flair. Scoop the beads into the straw

so that

they fill the Flair. Put enough in that when you flatten out your

Flair

the painted area is covered.
